**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 1 – 13 and 15 – 25 have been presented for examination.

#### *Election / Restrictions*

2. This application contains claims directed to the following patentably distinct claimed inventions. Restriction to one of the following invention is required under 35 U.S.C 121:

- I. Claims 1 – 12 drawn to a method for downloading the data text from a electronic library into an electronic book viewer upon comparing (i.e. authenticating) the unique key associated with data text of an electronic book to the unique key identifying the electronic viewer without user input of an identifier of the user in the library, classified in class 713, subclass 155.
- II. Claims 13 and 15 – 20 drawn to a method for transmitting a purchase order of an electronic book from the electronic library to a remote operations center and uploading a data file from a remote operations center into an electronic library, classified in class 726, subclass 6.
- III. Claims 21 – 25 drawn to a method for inserting a data text into a video signal from a remote operation center to the library,

decrypting and decompressing of an electronic book from an electronic viewer for copy protection using video cryptography, classified in class 380, subclass 201.

3. Inventions I, II and III are related as combination and subcombination disclosed as usable together in a single combination. The subcombination is distinct from the combination if it is shown to be separately usable. The following case instant:

Invention I provides a method for downloading the data text from a electronic library into an electronic book viewer by comparing (i.e. authenticating) the unique key associated with data text of an electronic book to the unique key identifying the electronic viewer without user input of an identifier of the user in the library (i.e. server provides computer authentication).

Invention II provides a method for transmitting a purchase order of an electronic book from the electronic library to a remote operations center and uploading a data file from a remote operations center into an electronic library for the purpose of network usage managements.

Invention III provides a method inserting a data text into a video signal from a remote operation center to the library, decrypting and decompressing of an electronic book from an electronic viewer for data processing protection with tamper resistant (i.e. copy protection using video cryptography).

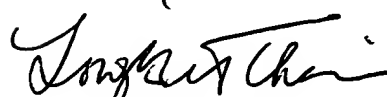

Art Unit: 2131

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.
